-

EXPERIENCE

Drupal Developer — Elevated Third (Seattle, WA) | 2023-2025

- Created custom Drupal themes and modules, translating Figma mockups into responsive, production-ready websites for new builds and ongoing client maintenance
- Optimized performance for 10+ client websites by resolving Lighthouse and PageSpeed Insights issues, improving scores by 20–40% per site and enhancing Core Web Vitals
- Updated legacy front-end build processes (Gulp → Webpack) across multiple client sites to modernize tooling and improve development workflow

Software Developer — GamePress (Austin, TX) | 2016 – 2023

- Maintained and enhanced a high-traffic Drupal multisite platform serving 50M+ pageviews monthly
- Launched game calculators and simulators that scaled to 200K+ monthly pageviews per tool, becoming key drivers of growth and community engagement
- Built an initial web platform using TypeScript, React, Next.js, and Strapi before iterating on a new tech stack for production
- Developed and launched a production web platform with TypeScript, React, Remix, and Prisma, achieving 600K+ pageviews in its first month
- Developed and launched two native Android apps with tens of thousands of downloads, achieving 4.5+ star ratings on the Google Play Store

Junior Web/Mobile App Developer — Upspring Media (Honolulu, HI) | 2015 – 2016

- Maintained and enhanced Drupal and WordPress websites
 - Developed and enhanced cross-platform mobile applications using the Corona SDK
-

EDUCATION

University of Portland — B.S. Computer Science, 2016
